Frequently Asked Questions:

- 1. Will you be providing props that match the theme of the event?**
We'll be bringing a variety of wedding-related, fun and generic props to the event.
- 2. Do you offer customized props as well?**
Yes, we can provide customized props or callouts at an additional cost, depending on the size and quantity. Send us a message for a quote.
- 3. Is a backdrop included in the photobooth package?**
Yes, the photobooth package comes with a standard backdrop, and you have the option to select from our collection of stock backdrops.
- 4. Can we also customize the backdrop?**
Yes, we also offer customized backdrops for an additional fee. Feel free to message us for a quote.
- 5. Can you confirm if soft copies or links are provided too?**
Yes, soft copies will be provided as an album link after the event.
- 6. I noticed that the photo booth package includes a photo frame. Could you please clarify what this means?**
This is one of the features that sets us apart! Our photobooth package includes a complimentary black photo frame/stand, so your prints are ready to display right away.
- 7. Are your photo prints resistant to fading over time?**
This is one of the standout features of our products and services. Our photo prints are fade-resistant and built to last for years. In fact, many of our returning clients share photos from past events as references when booking again, and the prints remain sharp and vibrant! It's our way of helping preserve your memories for a lifetime.
- 8. Do you also provide live feed projection so that the photos can be displayed on the venue's projector screen?**
We can offer two options for this:
Free Option – You may bring a flash drive, and your runner or representative can collect the soft copies from our booth in batches and submit them to the venue's projector team. This service is free of charge.
Paid Option – If you prefer, we can bring an additional laptop to connect directly to the venue's projector. This service comes with an additional charge. Please note that even with this setup, the photos will be displayed in batches and not in real-time.
- 9. Can we take a look at the design draft first?**
Once the booking is confirmed, we will gather your design preferences to guide the design process. You'll be working closely with our in-house designer, who will provide draft options for your review and approval. The design will be refined until you're fully satisfied with the final output.
- 10. Can we design our own template?**
Yes, you're welcome to send your own design. Please make sure to provide the layered, editable working file so we can properly integrate it into our system.
- 11. What is your expected arrival and setup time for the event?**
We will arrive 30–40 minutes before the event rental time to set up. Setup typically takes around 15–30 minutes, depending on the location and handling conditions.
- 12. How many power outlets do you need for the booth?**
We only require a single power outlet (standard 13amp).
- 13. Will there be staff present at the event to operate the photobooth?**
Yes, while the photoboos are automated, the package includes an IT specialist and an assistant to set up, operate and dismantle the booth.
- 14. I'd also like to inquire about the printing speed of your photo printers. At some of our previous events, slow printing caused guests to leave without their photos, so having a fast and efficient printing process is very important to us.**
Our printer operates at a speed of 8 seconds per print, and the entire photo session, including capturing the photo and transitioning, typically takes between 30 seconds to 1 minute. An IT and an assistant will also be present to manage and ensure a smooth photobooth experience throughout the event.
